Professor Robert Greene

Guia Rapida de Las 33 Estrategias de La Guerra (Alta Definicion) Professor Robert Greene

Current reality has become increasingly competitive and violent. Every day, at all hours and places, we are confronted with a ferocious antagonism that obliges us to be prepared not only to defend ourselves, but against those who would take advantage of us, all while conquering personal goals. With this in mind, the author puts within our reach the strategies that historical figures such as Julius Caesar, Napoleon Bonaparte, Winston Churchill, Frederick the Great, and Otto von Bismarck have adapted for a contemporary situation. The world of business, politics and life in general are composed of real battlefields that demand to be dealt with tactics, maneuvers and efficient plans. This concise guide summarizes the central ideas of the "33 Strategies of War," a book that delves into the minds of many of the leaders of the twenty-first century.
